

Jet CXV TurboDryer®

Streamlined for high velocity airflow, fast drying and cleanup.

Aerodynamically designed for the highest velocity airflow at 3100 tested CFM – the Jet's built-in angles maximize laminar airflow along the floor. Its focused vanes channel extra velocity in all the right places and the unit's molded design offsets from the wall for optimizing the fastest wall and floor drying.

Along with powerful airflow and minimal amp draw, the Jet is significantly quieter thanks to the unit's double-walled construction. Quick stackability on the Unimover handtruck – make the transport of multiple Jet easy.

Item #F367

Product Features

- Low amps - 1.5, 2.0 and 3 amp speeds
- Daisy-chain up to 8 units (on low speed) using convenient onboard outlet
- Run 200 feet without an extension cord
- Built in stand and non-skid rubber feet for safely drying face down
- Quick convertible access for cleaning components
- Easy stacking for storage and transport on the Unimover handtruck
- Built-in Microban® antimicrobial product protection to inhibit the growth of odor and stain causing bacteria, mold and mildew in this machine.
- Dri-Eaz legendary durability & reliability

Product Specifications

Model	F367
Dimensions (H x D)	25.9 x 18.9 in. 65.8 x 48 cm
Power	1.5, 2.0, 3.0 amps, 115V
Speed	3 speed switch
Operating positions	2
Motor	0.25 HP
Weight	35 lbs 16 kg
Cord length	25 ft. 7.62 m
Construction	Rotomolded polyethylene shell
Stackable	Yes
Safety	ETL tested to UL/CSA Standards
