## Stone & Tile Cleaning, Restoration & Refinishing Course

This course was designed for anyone interested in performing quality stone and tile cleaning, restoration, modifying and refinishing services. This event covers the most popular stone and tile restoration services in a hands on environment. This class is meant to give the student experience with various types of equipment, processes and chemicals to gain confidence in order to actually go out the next day and start generating revenue.

This class is designed to provide the attendee with direct product and procedure application training that allows the student to start performing profitable stone care work the day after the class is over. It is not designed to teach highly technical, generic information that makes the student into a geologist. It is designed to provide the student with the right amount of knowledge and technical know-how to properly care for residential and commercial stone floors and other stone surfaces.

The course includes:

### ► Floor Content

- Man-Made
- Natural Stone
- Types of Grout

### ► Surface Types and Characteristics

- 4 Step Surface Testing - Floor Identification Methods
- 5 Step Inspection Process
- Job Preparation & Set-Up
- Equipment & Tools
- Chemical Solutions
- Estimating and Sales
- Stone Polishing Using Spinerger Pads
- Stripping Coatings

### ► Cleaning Natural Stone and Tile

- Preventative Maintenance
- Routine or Daily Maintenance
- Restorative Cleaning
- Acid Cleaning for Stone, Tile & Grout
- Countertop Maintenance
- Sealing Procedures
- Special Issues & Challenges
- Transforming & Modifying with Color Enhancer/Sealer

### ► Surface Treatments

Receive ½ Continuing Education Credits for attending this event.
